

## Special Issue

# Industrial Wastewater Treatment and Recycling

### Message from the Guest Editors

The focus of this Special Issue on “Industrial Wastewater Treatment and Recycling” aims to collect up-to-date research articles that explore, examine, and make proposals for optimizing the treatment process(es) dealing with unconventional substrates. Particularly, we are interested in the potential of biological processes, as the most eco-friendly options.

- Contaminants in industrial wastewaters;
- Toxicity;
- Industrial wastewater treatment systems;
- Wastewater recycling;
- Integrated chemical-biological processes for wastewater treatment;
- Bio-processes for methane and hydrogen production;
- Bioenergy from lignocellulosic wastes;
- Bio-processes to produce platform chemicals from wastes;
- Nanomaterials for the promotion of microbial processes;
- Bioelectrochemical systems (BESs);
- SDGs impact assessment;
- Life-cycle assessment.

---

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
