

Special Issue

Information Systems and Digital Business Strategy

Message from the Guest Editor

The current business landscape is witnessing a radical transformation triggered by the emergence of digital technologies. Our society is increasingly transforming and deploying digital innovations to areas using mobile devices, and various digitally enabled payment platforms. Such radical changes inevitably require different theoretical and practical understanding as managers grapple with developing and deploying effective digital business strategy. It is still unclear how businesses, societies, government agencies, and various stakeholders can effectively develop and deploy digital business strategies across various segments of society. Indeed, little research exists on the boundary conditions that foster the development and implementation of digital business strategies needed to drive digital innovation initiatives and enterprise-wide transformation (Nwankpa and Datta 2017). Therefore, this Special Issue intends to expand this emerging work and drive a research agenda on information systems and digital business strategy. We invite papers that address interesting questions around digitization and digital business strategy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
