

Special Issue

Innovation in Physical Education, Physical Activity and Sport

Message from the Guest Editors

The technological revolution has meant an increasing use of digital media since its beginning in the 1960s and 1970s. The 2010s saw the widespread use of technologies aimed at interconnectivity between people. This digitization and increase of online interconnectivity had its peak during the COVID-19 pandemic, which forced us to rethink the management systems for teaching in physical education, the practice of physical activity for leisure and recreation, and even the maintenance of the practice of high-performance sport. This accelerated process of technologization has meant a paradigm shift in the management of the physical-sports experience that can only be successfully faced from the perspective of innovation. We are not only talking about technological innovation that facilitates the practice of physical activity, but also about innovative processes and methods that include technologies and online interpersonal interaction. Physical education, physical activity has to adapt to this new reality. We invite you, through this Special Issue, to publish your experiences and research in this field, related to innovation in the management of teaching, physical activity and sport.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
