Embracing Innovation – How Technology and Science Can Help Improve Response in Future Crises, Public Health Emergencies, and Disasters

Message from the Guest Editors

Considering climate change and other conditions, the risk of disasters requires a comprehensive approach on the part of all entities dealing with crisis management. Despite the advanced technologies available to predict weather phenomena, it is often unmanageable to take remedial measures, and the best solution is to suitably prepare for, and efficiently operate after, the occurrence of any given crisis. This Special Issue seeks research papers on new approaches that have been applied or are under development to improve preparedness and emergency response. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
