

## Special Issue

# Sustainable Utilization of Biowaste and Circular Economy for Food

### Message from the Guest Editors

Microorganisms, such as bacteria, yeast, algae, and mold, have been utilized to enrich our daily life in food for thousands of years. Useful materials such as energy resources, preservation agents, flavor enhancers, and functional substances can be produced according to specific fermentation process, cultivation or reaction. Owing to progress of Nematoda mode, Next Generation Sequencing and metabolomics technologies, the comprehensive analysis of the processes can be further achieved. The by-product of manufacturing process is believed to have valuable substances which are functional, such as anti-aging, anti-oxidation, nutritional supplementary, but underestimated. We invite the papers about microbiological analysis of food products, affording excellent modification of traditional uses of microbial products and supplying novel applications of new or underestimated substances produced by microorganisms, to submit to this special issue.

### Guest Editors

Prof. Dr. Eriko Kage-Nakadai

Graduate School of Human Life Science, Osaka City University, Osaka, Japan

Prof. Dr. Chien-Sen Liao

Faculty of Department of Medical Science & Biotechnology, College of Medical Science and Technology, I-Shou University, Kaohsiung 82445, Taiwan

### Deadline for manuscript submissions

closed (15 November 2021)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
