

Special Issue

Sustainable Insect Production for Food, Feed and Technical Application

Message from the Guest Editor

This Special Issue is intended to comprise a selection of papers from the fast-growing global insect industrial sector, aiming to provide sustainable food, feed, and technical products. The papers span the entire value chain from choice of resources as insect feeding substrate, and insect production, to product application. Sustainability and sustainable development cover environmental, social, and economic dimensions and require a multi-disciplinary approach to ensure a critical and holistic analysis and assessment, as will be reflected amongst the contributions. However, to provide a wider perspective of sustainability, albeit with an emphasis on insects, contributions in other areas such as animal welfare, governance, sustainability assessment, and policies, as well as sustainable management of land and biodiversity, will also be considered. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
