

Special Issue

Intellectual Capital and Sustainability

Message from the Guest Editors

The importance of intellectual capital as a strategic resource has been known since ancient times. Firms' interest in such topics has exhibited a rapid growth, which is more notable in firms whose benefits originate primarily from innovation and knowledge-intensive services. Nevertheless, this is not only a topic applicable to firms. Intellectual capital management is also pertinent for governmental and no lucrative organizations. Its study of the territories should not be ignored because, although few have so far studied their wealth on intellectual capital terms, there is no debate over the importance of intellectual capital on territory development. Therefore, with the objective of increasing the knowledge on this topic, the purpose of this Special Issue is to publish articles of empirical research and theoretical high-quality reviews that study the relation between intellectual capital and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
