

## Special Issue

# Intellectual Capital and Sustainability

### Message from the Guest Editors

The importance of intellectual capital as a strategic resource has been known since ancient times. Firms' interest in such topics has exhibited a rapid growth, which is more notable in firms whose benefits originate primarily from innovation and knowledge-intensive services. Nevertheless, this is not only a topic applicable to firms. Intellectual capital management is also pertinent for governmental and no lucrative organizations. Its study of the territories should not be ignored because, although few have so far studied their wealth on intellectual capital terms, there is no debate over the importance of intellectual capital on territory development. Therefore, with the objective of increasing the knowledge on this topic, the purpose of this Special Issue is to publish articles of empirical research and theoretical high-quality reviews that study the relation between intellectual capital and sustainability.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
