Special Issue

Sustainable Irrigation System

Message from the Guest Editor

The studies of this Special Issue are expected to address the following topics:

- Efficient and accurate irrigation scheduling methods that may contribute to the reduction of the water consumption and groundwater contamination. New cutting-edge methods applied to the irrigation management.
- Design and management of irrigation systems for an improved efficiency, both at farm and irrigation district scale. Assessment of the irrigation efficiency and productivity in irrigation districts.
- Evaluation of the Nonpoint source pollution caused by the irrigated agriculture. Methods and policies to reduce its environmental impact.
- Water resources planning studies intended to cope with the scarcity and poor quality devoted to irrigation.
- Studies focused on encouraging the use of desalinated or regenerated water in agriculture
- Evaluation of the energy consumption of the irrigated agriculture and design and management of irrigation system that make use of renewable sources of energy.
- Evaluation of the impact of climate change on irrigated agriculture, methods and policies to cope with the problems caused by the climate change.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
