

Special Issue

Impact of Digital Transformation of Industries on Economic Sustainability

Message from the Guest Editors

This Special Issue contributes to the field of sustainability by verifying and exploring operational efficiency and cost reduction, innovation and competitiveness, supply chain management and logistic issues, the circular economy, recycling, new sustainable business models, and both challenges and opportunities. In summary, the digital transformation of industries is playing a crucial role in promoting economic sustainability. Indeed, by driving efficiency, innovation, and the adoption of more sustainable practices, digitalization is helping to create a more resilient and equitable economy for future generations. With the constant scientific advancements and developments that are taking place around these topics, we invite research for this Special Issue that aims to address sustainability, product development, Industry 4.0, information integration, green supply chains, lean manufacturing, the circular economy, reverse logistics, and market performance. The suggested topics, as well as original research articles and reviews, are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
