

Special Issue

Sustainable Engineering: Intelligent Design and New Material Development for Automobiles

Message from the Guest Editors

This Special Issue of Sustainability solicits articles that present new concepts and methods as well as case studies in the field of intelligent design and new material development for automobiles. The overall goal is to exchange research and applied working knowledge in the field of automotive structural engineering design. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Multi-objective evolutionary algorithm based on heuristic information
- Multi-objective optimization method driven by adaptive learning mechanism
- Machine learning optimization method for small sample data
- Objective-oriented smart sampling strategy for expensive black-box functions
- Optimization and applications of light materials (high strength steel, aluminium alloy and magnesium alloy, etc.)
- Research and design application of mechanical properties of fibre reinforced composite materials
- Mechanism research and optimization design of new mechanical metamaterials

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
