

Special Issue

Tourism, Sustainable Development, and Cultural Heritage

Message from the Guest Editors

Tourism developments often align with wider renewal or redevelopment projects where urban or regional planners seek to enhance the use of spaces and places. Investments in tourism, especially in post-industrial cities and wider regions, are part of nascent regeneration strategies linked to transitioning economics. However, it is important to look at tourism and urban regeneration with a particular focus on cultural heritage. Cultural heritage consists of tangible heritage and intangible heritage. The wider need for and impact of such work is that affected areas seek change in efforts to keep up with shifts in demand in the global economy. As such, these places are able to maintain a competitive advantage. Without making such changes, destinations risk stagnation and decline, as increased competition leads to increased opportunities and choice for consumers.

We invite the submission of studies with a focus on a city or region in relation to cultural heritage attractions that have seen nascent development play a defining role in new tourism products, and thus a new tourism economy, to align with urban policy initiatives.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
