

Special Issue

Reliable and Sustainable Materials for Use in Structural Engineering Applications for the Built Environment

Message from the Guest Editor

The aim of this Special Issue is to highlight advances in sustainable materials development that are applicable for structural engineering applications. The focus should be on enhancement to extend the life of structures and sustainability either through material advances within the concrete system or the reinforcement approach/technology. The suggested research areas include highly sustainable innovative concrete materials that focus on improved long-term durability/service life, enhanced resiliency, reduced maintenance and/or reduction of environmental impact through material reuse. Articles related to the use of new or innovative repair and rehabilitation strategies for structural engineering applications are also invited and encouraged. Detailed topics are here:

- Innovations in advanced sustainable concrete materials focused on structural engineering applications.
- Non-metallic reinforcing innovations for new construction and/or repair and strengthening applications.
- Innovations in new resilient coating systems to combat steel-reinforcing corrosion or innovative anti-corrosion approaches.

Any questions, please ask Mark Huang .

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
