

Special Issue

Sustainability in Fuel Consumption and Pollutant Emission Management

Message from the Guest Editor

It is universally acknowledged that long-term development can only be achieved through sound environmental management, that is, sustainable development, especially important in fuel consumption and pollution emission, which is the focus of this Special Issue. Pollution emissions are one of the world's largest health and environmental problems. The amounts and types of pollution emissions change every year. Sustainable development requires minimizing the consumption of fuel and the generation of pollutants waste and toxic pollution emissions throughout the entire production and consumption process. This Special Issue welcomes high-quality process-oriented and hypothesis-based submissions that report results from original and novel research related to fuel consumption and pollution emissions under the Sustainable Development Goals on a regional or global scale. Discussions on the effects of fuel consumption and pollution emissions under the Sustainable Development Goals are welcome. Keywords

- Fuel consumption
- Pollution emissions and control
- Energy access
- Environmental remediation
- Catalytic material
- Sustainable development

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
