

## Special Issue

# Sustainable Soil Management: Conservation Strategies for Agricultural Resilience

### Message from the Guest Editors

This Special Issue covers a wide range of research and reviews articles that will augment our understanding of this fascinating field of sustainable soil management and conservation agriculture research to raise awareness of sustainable agricultural practices such as soil conditioning, biomass conversion, crop rotation, intercropping, precision agriculture and agroforestry that can mitigate greenhouse gas emissions and facilitate the development of new strategies, methods and technologies for soil conservation within the agricultural ecosystem.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
