

Special Issue

Sustainable Soil Management: Conservation Strategies for Agricultural Resilience

Message from the Guest Editors

This Special Issue covers a wide range of research and reviews articles that will augment our understanding of this fascinating field of sustainable soil management and conservation agriculture research to raise awareness of sustainable agricultural practices such as soil conditioning, biomass conversion, crop rotation, intercropping, precision agriculture and agroforestry that can mitigate greenhouse gas emissions and facilitate the development of new strategies, methods and technologies for soil conservation within the agricultural ecosystem.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
