Sustainable Resources and Environmental Management for Regional High-Quality Development

Message from the Guest Editors

High-quality development is an inevitable requirement to promote economic transformation and upgrading, following the laws of economic development. While accelerating economic development, we must take measures to strengthen the environmental governance capacity and efficiently utilize and rationally develop resources so that economic development not only adapts to the carrying capacity of resources and the environment, but also has an inexhaustible source of power, which can then accelerate sustainable development and meet new human needs. However, there are still problems within regional development, such as insufficient sustainable development momentum, weak scientific and technological innovation, low-level intensive development and resource utilization, etc.

Thus, we need to focus on cracking the key to these bottlenecks of sustainable development, incorporating carbon peaking and carbon neutrality into our overall development; promoting quality change, efficiency change and power change in economic and social development; and exploring system solutions for high-quality sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
