Special Issue

Sustainable Urbanism: Definition, Assessment, and Agenda for Future Research

Message from the Guest Editor

I am pleased to invite you to submit an original research article to this Special Issue

of Sustainability, "Sustainable Urbanism: Definition, Assessment and Agenda for Future Research." The Special Issue recognizes that urban sustainability is inextricably linked to other kinds of sustainability and the goals outlined in the United Nations' Sustainable Development Goals (and its related urban-focused document, the New Urban Agenda). Both documents acknowledge that human settlements are crucial for human movement, interaction and resource consumption; responsible for many or most of humanrelated impacts on the planet; and directly related to the quality and durability of human life. It is therefore crucial that human settlements receive special attention as we work toward more truly sustainable systems. Research areas may include (but are not limited to) the following: Metrics, diagnostics and certifications for urban sustainability:

The urban dimensions of climate change: adaptation, mitigation and resilience;

The ecology of cities: social, economic and natural systems;

Natural systems in cities: water, air, soil, flora and fauna;

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
