Special Issue

Food Management: Effective Strategies for a Sustainable Environment

Message from the Guest Editors

Effective food management plays a key role in building a sustainable environment. Efficient food management involves, among other things, proper purchasing, optimal product storage conditions, quality assurance at every stage of the supply chain, as well as consumer education. Food waste poses a significant challenge to resource management and the implementation of sustainable development strategies. At both organizational and national levels, implementing food waste monitoring systems and educating stakeholders throughout the food chain on responsible food management are essential for protecting the environment. Through education, consumers can develop pro-environmental skills and apply them in everyday life. Such activities support both the protection of the planet and the building of more responsible communities. This Special Issue will include a selection of recent research and current review articles about the following:

- Food management.
- Strategies to reduce food waste.
- Sustainable food consumption and production.
- Educational programs and campaigns to raise awareness of the problem of food waste.
- Strategies for Environmental Sustainability

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
