

Special Issue

Innovative Research Methods for Sustainable Educational Development

Message from the Guest Editor

This Special Issue focuses on advanced and innovative research methods in education sciences. Innovative research methodologies are crucial for sustainable educational advancement for various reasons. As educational institutions encounter swift transformations driven by globalization, technological progress, and evolving societal demands, conventional research methodologies may prove inadequate in effectively tackling these difficulties. Several fundamental considerations underscore the necessity of innovative research methodologies:

- The need to solve complex educational problems;
- Increasing dependence on technology in education;
- Promoting inclusion and equality;
- Promoting interdisciplinary collaboration for the development of sustainable education;
- Identifying new pedagogical models that better suit the needs of the 21st century;
- Developing personalized learning environments appropriate for 21st-century learning skills
- Understanding the increasing student movements on digital platforms and identifying ways to increase accessibility to these environments;
- Continuous improvement and innovation: increasing use of artificial intelligence in education.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
