

## Special Issue

# Sustainability of Supply Chain and Logistics System: Opportunities and Challenges

### Message from the Guest Editors

“Sustainability of Supply Chain and Logistics System: Opportunities and Challenges” integrates environmental sustainability into traditional logistics and supply chain processes. It focuses on minimizing ecological impacts through eco-friendly practices across the entire product lifecycle, from raw material sourcing to end-of-life disposal. The Special Issue aims at solving the operations research problems arising in sustainable logistics optimization and supply chain management.

Sustainability of Supply Chain and Logistics System aligns closely with the aim and scope of Sustainability by addressing the journal’s multidimensional focus on technical, environmental, cultural, economic, and social sustainability.

In this Special Issue, research areas may include (but are not limited to) the following:

- Green vehicle routing;
- Green supply chain network design;
- Reverse logistics network design;
- Sustainable biomass collection network design;
- Green sailing;
- Green production and scheduling optimization;
- Sustainable emergency logistics network;
- Optimization of multimodal network;
- Distribution optimization of new energy vehicles.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
