Special Issue

Advancements in Digital Logistics and Maritime Supply Chain Innovation: A Sustainable Development Perspective

Message from the Guest Editors

With an emphasis on sustainability, this Special Issue will examine how advancements in digital technologies, including, but not limited to, Al and ML, are enhancing supply chain organizations, particularly the performance of maritime transport and logistics operators, while simultaneously improving safety and resilience. In addition to efficiency and profitability, we will explore how digital logistics solutions enhance the endcustomer experience, specifically within the framework of sustainable maritime supply chain management practices. Sustainability is of paramount importance in contemporary supply chain management, with varied emphasis on financial, environmental, and broader social factors, which are considered in real-life Al projects in logistics and transportation companies. Innovation management and information technology management cases are expected to highlight the choices, barriers, and measured impacts of digital transformation, including Al-powered logistics and maritime transport on the environmental footprint of supply chains, as well as their contributions to responsible workforce management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
