

## Special Issue

# COVID-19 Pandemic and Stakeholder-Oriented Corporate Governance in Sustainable Corporations

### Message from the Guest Editor

The impact of the COVID-19 pandemic has been enormous and unpredictable for the sustainability of corporations worldwide. Under the transition era of corporate governance in stakeholder-oriented corporate governance, there might be a significant research question of how shareholder activism has affected corporate actions during the COVID-19 pandemic (Yoshikawa and Chua, 2020). Thus, it is crucial to reveal how the feature of national-level corporate governance is helpful in solving any agency problem and can contribute to sustainable corporations under the threat of pandemics. In this Special Issue, we welcome papers that intend to reveal how different national-level corporate governance mechanisms have affected corporate actions and stock market responses during the worldwide pandemic era. Thus, this Special Issue will focus on empirical and case studies which attempt to reveal the role of stakeholder-oriented corporate governance mechanisms.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
