

Special Issue

Integrating Virtual Reality and Sustainable Architecture for Building Occupants-Centric Design

Message from the Guest Editors

This Special Issue seeks scientific and innovative investigations targeting VR assessment methods and design solutions contributing to more sustainable, comfortable, and supportive user-centred built environments. The goal of this collection is to enhance and leverage the current limited adoption of VR and advanced experimental approaches for occupant research to address and improve the human dimension in buildings, promoting sustainability and well-being in the built environment. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
