

Special Issue

Technology Innovation and Policy for Sustainability: Challenges and Opportunities

Message from the Guest Editor

In order to reduce the resistance brought by environmental pollution to the achievement of sustainable development goals, governments and regions around the world have developed different policies. These policies come in the form of incentive and penalty policies, as well as mixed policies. Unfortunately, the influencing factors and mechanisms of different types, intensities, and approaches of environmental policies are not equally understood. Therefore, this Special Issue aims to meet the interdisciplinary scope requirements of *Sustainability* through the lens of technology innovation and policy for sustainability. This Special Issue plans to present an overview of the most recent advances in the field of technology innovation and policy formulation for sustainability and their applications in diverse areas. Specifically, we aim to provide new contributions to technology innovation and policies for sustainability in different industries, e.g., construction, manufacturing, mining, transportation, and agriculture.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
