# **Special Issue**

# Advanced Technologies and Sustainable Innovation in Wastewater Treatment

### Message from the Guest Editors

Water contamination has an important impact on the environment, ecosystems, and public health. This impact can be absorbed by the amount and quality of water used in agriculture, industry, and human consumption. In this context, it is necessary to develop effective technologies and processes for the prevention of water contamination, treatment of wastewater, and reclamation of contaminated waterbodies and other polluted sites.

Conventional water treatment processes are less effective against emerging pollutants due to their persistence in effluents. This is why it is necessary to innovate in water management and treatment to achieve sustainable use without compromising public health, the economy, and recreational uses and while preserving natural resources for the future.

The water sector is experiencing rapid technological advancement. Up-to-date information on the most innovative technologies would enable solutions to meet regulatory requirements, user needs, efficiency, cost-effectiveness and circularity.

The aim of this Special Issue is to gather a range of new research studies to help to solve the above problems associated with the sustainable use of water.

#### Guest Editors

Dr. Santiago Urréjola-Madriñán

Defense University Center, The Naval Military School of Spain, Thermal and Environmental Engineering Group (InTeam), Marín, Spain

Dr. Susana Gouveia

BiotecnIA Group, Department of Chemical Engineering, University of Vigo, Vigo, Spain

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
