Critical Issues of Knowledge Management for Sustainable Organizations

Message from the Guest Editors

Knowledge management (KM) is a discipline that focuses in the manner that knowledge, which is widely recognized as a primary source of competitive advantage and a core competency, is created, acquired, shared, stored, and applied in and between organizations. KM research has steadily grown over the last three decades, with contributions coming from different academic ambits, such as knowledge epistemology, organizational learning, information and technology approaches, or resource- and knowledge-based views of the firm. Meanwhile, sustainability is gaining increasing importance for organizations in every business sector, where concerns about social and environmental responsibility equal the importance of a firm's economic viability in fulfilling its stakeholders' demands. Sustainability also introduces social and ecological dimensions in the innovation processes of companies. The creation and use of new knowledge contribute to foster sustainable-oriented innovation in technologies, product, or services... Dr. Fátima Guadamillas

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
