Special Issue

Study and Research Between Cultural Heritage and Sustainable Development Goals for the Built Environment in Transition

Message from the Guest Editors

Dear Colleagues: The processes of transformation and adaptation of the built environment are still far from achieving the goals of Agenda 2030 and many other international documents. Cultural heritage as a tangible testimony to the history of local communities should be enhanced to meet the performance requirements of sustainability. The contemporary challenges in the field of sustainability are based on the demands of social welfare and climatic impact mitigation. With the transformative nature of any place, the concept of identity can be enriched over time with new meanings and perceptions in the changing context. Building a shared identity is one of the essential goals for a sustainable future in which transformation and integration choices can be considered acceptable. Contributions from the scientific community are welcome on holistic approaches able to accompany the narrative of cultural heritage without denying the identity of places undergoing transformation. The suggested issues refer to the following:

Innovative and circular regeneration models; Green transition approach in the cultural heritage; Best practices of adaptive reuse of cultural heritage.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
