

Special Issue

Latest Research on Sustainable Material Performance and Circular Economy

Message from the Guest Editor

At present, there is continuous concern for the development of eco-friendly products, as substitutes for conventional ones, that do not use virgin raw materials. Therefore, new innovative materials are being developed and validated that can promote the integration of circular economy principles in different industries. The unique advantages of employing waste as a raw material, in terms of the environment and economy, have promoted this change. However, due to the high diversity of wastes and their intrinsic differences compared to virgin sources, the validation of these green products and their use are still limited. Moreover, some of the main challenges in this field are the standardization of preparation processes and the reduction of costs. This Special Issue aims to bring together the latest research in the development of sustainable materials and the integration of circular economy principles in different industries.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
