# Sustainable Integrated Pest Management: Achievements and Challenges

### Message from the Guest Editors

The goals of attaining global food security and alleviating poverty are challenged by significant crop losses worldwide due to invertebrate pests, pathogens, and weeds. In the context of food security, agricultural losses due to pests and diseases equate to the amount of food required to feed over one billion people. Integrated pest management (IPM) is a pest management system that is designed to be sustainable. In this regard, this Special Issue, titled

## "Sustainable Integrated Pest Management:

Achievements and Challenges", aims to provide the most relevant experiences and main scientific output through research papers that present basic and applied research in areas of integrated pest control strategies that are currently being developed and used to manage pests of agricultural importance. The scope of this Special Issue includes but is not limited to research on biocontrol agents (botanicals, endophytes, entomopathogens, parasitoids, and predators), farming systems applying IPM approaches, the application of biotechnology in IPM, challenges in adopting IPM, and the application of IPM for agricultural transformation for sustainable development.

# **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
