

Special Issue

Energy Policies, Energy Security and Energy Transition in East Asia

Message from the Guest Editor

Energy security is considered essential for sustainable development. At the economic level, energy assets, infrastructure, supply chains and trade routes are applied to the security of energy. At the political level, energy security is described as a system of national policies and international mechanisms designed to quickly respond, in a cooperative and coordinated manner, to emergencies such as supply disruptions and oil price spikes to maintain energy supply stability. At the environmental level, energy security is linked to climate change and environmental issues.

In order to adapt to the new situation of energy security, corresponding energy policies must be implemented to ensure energy supply and cope with climate change. The evaluation of energy policy and related case studies have both academic and practical value.

The topics of this Special Issue will include, but are not limited to: The measurement of energy security and evolution of energy policies; Methods and tools for energy policy evaluation; Research on energy policies and their national, regional and global implications; Discussion on issues related to energy transition.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
