

Special Issue

Biodiversity, Biologic Conservation and Ecological Sustainability—2nd Edition

Message from the Guest Editors

Since the Industrial Revolution, human activities have significantly impacted ecosystems at both global and local scales through climate change and other environmental pressures. These impacts have led to biodiversity loss and ecosystem disruption, making it crucial to understand and research these threats for effective conservation. Successful management interventions require deep knowledge of how ecosystems respond to multiple stressors. We must implement sustainable development models that balance environmental conservation, social equity, and human development. This Special Issue of *Sustainability* welcomes original contributions on biodiversity (genetic, biotic, and landscape) and conservation biology. We encourage submissions covering ecosystem restoration and sustainability across species and habitat conservation. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
