

Special Issue

Municipal and Industrial Wastewater Treatment Processes for Sustainable Water Reuse: Classic and Emerging Pollutants

Message from the Guest Editor

Water scarcity and pollution are serious problems for many countries all around the world, especially in regions with limited water resources. In response to these problems, there has been increasing interest in developing and improving wastewater treatment technologies in order to meet the safety discharge limits for reuse. As a result, water reuse now makes an important contribution to water supply, and a range of technologies are used in different parts of the world. Municipal and industrial wastewater treatment and reuse technologies are well-established fields. But there are still many challenges that need to be faced before we reach a stage of real sustainable wastewater treatment that would protect both the environment and human health. This issue aims to share quality research on safe and sustainable wastewater treatment and reuse, considering classic pollutants and emerging pollutants, as well as the great challenges that the sector faces if it wants to be environmentally, economically, and socially sustainable. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
