

Special Issue

Sustainable Digitalization: Access to Information and Information Preservation

Message from the Guest Editors

Sustainable digitalization is more critical than ever, as digital technologies are deeply integrated into our daily lives. This concept focuses on preserving digital content for future generations while ensuring fair access to knowledge. It aims to strike a balance between environmental stewardship and technological innovation. As the volume of digital resources grows rapidly, we face challenges related to their lifespan and accessibility, necessitating innovative solutions for knowledge preservation. This Special Issue aims to foster inclusivity and resilience in response to ongoing technological advancements, addressing these challenges and contributing to the creation of a more sustainable digital environment. This topic aligns closely with the *Sustainability* journal's focus on multidisciplinary research aimed at addressing sustainability in environmental, social, and economic dimensions. This Special Issue will enhance our understanding of how digital practices can support sustainable development goals by emphasizing sustainable digitalization, ultimately fostering a more resilient and inclusive digital future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
