Sustainable Vocational Education of International Students

Message from the Guest Editors

With the deepening of economic globalization and the increasing flow of production factors and talents around the world, internationalization of vocational education is highly valued by most countries. Vocational education is closely linked to economic and social development and is of great significance in promoting employment and entrepreneurship, boosting economic and social development, and improving people's well-being. Under this common vision, we should learn from each other to promote improvement and go hand in hand for common development. Especially for international students who accept vocational education in different countries, they need more recognition for their professional qualifications around the world. It is necessary to work together deeply to form global standards for quality evaluation of vocational education, and promote vocational international mutual recognition system. So, in this issue, we welcome experts to conduct dialogue and share policies on promoting international cooperation on vocational education. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
