

## Special Issue

# Natural Quality, Environmental Resources and Global Value Chain

### Message from the Guest Editor

In recent years, with the worsening of global environmental quality, environmental protection has gradually become the focus of the world. With the process of economic globalization, environmental pollution in many local areas has evolved into global environmental pollution through trade, FDI, technology transfer, and other media, and has become a fundamental threat to human. This Topical Collection invites scholars and experts to a systematic and in-depth discussion on environmental quality, natural resources, and Global Value Chains. The topics of interest include, but are not limited to: industrial intelligence and GVC in the digital era; climate change, carbon emissions, and GVC; government efficiency, biodiversity loss, and joining GVC in emerging markets; sustainability and biology resource and planning; environmental quality and labour efficiency; environmental quality, carbon emissions, and transfer; environmental quality, economic growth, and natural resources governance; review of natural resources, and GVC; resource abundance; green economic growth in developing countries; technological innovation, and environmental pollution; survival and sustainable development.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
