

Special Issue

Life below Water: Marine Biology and Sustainable Ocean —2nd Edition

Message from the Guest Editors

The aim of this Special Issue is to collect papers regarding the biodiversity conservation and protection of marine ecosystems, paying special attention to innovative tools for monitoring both natural and anthropic disturbances, mitigation measures, and the restoration of marine habitats. The present issue will be devoted to studies focused on the conservation of marine biodiversity, including relevant papers dealing with population genetics and systematics, forensic studies, environmental crimes and the sustainable exploitation of marine biological resources, innovative tools for species detection and monitoring (for example, environmental DNA), and the occurrence and impact of invasive alien species. It will also include papers related to different environmental contaminants (for example, metals, POPs, marine litter, and emerging contaminants), their levels in water and sediments, and their bioaccumulation and effects on marine species.

Guest Editors

Dr. Stefania Chiesa

Dr. Livia Lucentini

Dr. Silvia Maltese

Dr. Alfonso Scarpato

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
