

Special Issue

Design of Sustainable Supply Chains and Industrial Processes

Message from the Guest Editors

This Special Issue, entitled “*Design of Sustainable Supply Chains and Industrial Processes*”, aims to gather high-quality research that explores conceptual, methodological, and application-oriented contributions in this domain. We welcome the submission of original research articles and reviews that offer novel insights into modelling, evaluating, and enhancing industrial processes and supply chain systems through structured frameworks. The scope of this Special Issue includes, but is not limited to, the following topics:

- Frameworks for the performance measurement and assessment of industrial processes and supply chains;
- Frameworks identifying the key drivers, enablers, and risk factors impacting the efficiency of processes and supply chains;
- Design frameworks supporting performance improvement strategies and continuous optimization;
- Frameworks incorporating digitalization, automation, and sustainability in the context of Industry 4.0 and Industry 5.0;
- Case studies and applications of framework-based approaches in industrial and logistics systems.

We look forward to receiving your contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
