# Integrating the Triad: Carbon Neutrality, Circular Economy, and Energy Transition for the Sustainable Development

# Message from the Guest Editor

Achieving sustainable development in the 21st century requires integrating three transformative agendas: carbon neutrality, the circular economy, and the energy transition. Each of these pillars plays a critical role in reducing environmental impact, promoting resource efficiency, and ensuring energy security. However, these dimensions are often studied and implemented in isolation, leading to fragmented policies and suboptimal outcomes.

This Special Issue seeks to bridge the gap between these three domains and explore synergistic strategies that enable societies and industries to move toward a resilient, low-carbon, and circular future. It aims to publish cutting-edge research, comprehensive reviews, and case studies that demonstrate how integrating carbon neutrality, circular economy practices, and energy transition policies can accelerate sustainable development at multiple scales — from local communities to global systems.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
