

Special Issue

Green and Low-Carbon Development: Emissions and Control Strategies for Air Pollutants and Greenhouse Gases

Message from the Guest Editors

This Special Issue aims to bring together researchers, practitioners, and experts from various disciplines to explore the latest advancements, challenges, and opportunities in the emissions control of air pollution and greenhouse gases, with a specific focus on benefits, pathways, and technologies. In this Special Issue, original research articles, reviews, and case studies are welcome. Research areas may include (but are not limited to) the following:

- Multiple air pollutants and greenhouse gases generation and influencing factors;
- Multi-scale emission inventories of air pollutants and greenhouse gases;
- Synergistic emissions reduction of air pollutants and greenhouse gases;
- Scenario analysis of air pollutants and greenhouse gas emissions;
- Risks associated with air pollutants and greenhouse gas emissions;
- Air pollutant and greenhouse gas emissions control technologies and materials;
- Sustainable evaluation of air pollutant and greenhouse gas emission control technologies;
- Policies for synergistic emissions reduction of air pollutants and greenhouse gases.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
