

Special Issue

Addressing Climate Change Mitigation and Adaptation at the Organizational Level

Message from the Guest Editors

We are excited to announce our forthcoming Special Issue, entitled “Addressing Climate Change Mitigation and Adaptation at the Organizational Level”. Advances in sustainable performance metrics and targets, strategic implementation, and the reporting of climate change mitigation and adaptation are now more challenging for companies than ever, as confirmed by the introduction to the Corporate Sustainability Reporting Directive (CSRD) requirements and the European Sustainability Reporting Standards (ESRSs). Taking urgent action to combat climate change (SDG 13) and its impacts is one of the main pillars of the CSRD and is explicitly addressed by ESRS E1 “Climate change.” This Special Issue welcomes articles that can provide new findings, innovative sustainable tools, and critical insights on plans, measures, and reports of climate change mitigation and adaptation at an organizational level. Both theoretical and empirical papers that provide new insights into the reasons, processes, practices, and implications of sustainability reporting and managing climate change mitigation are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
