# Landscape Connectivity for Sustainable Biodiversity Conservation

## Message from the Guest Editors

The recognition of the role of landscape connectivity in biodiversity conservation has increased considerably at the international level, and it is a central topic in ecology and conservation science. However, the practical implications of landscape connectivity for conservation are not clearly recognized in the identification and planning of conservation areas, with effects on their long-term sustainability unknown. Scientists and managers must solve several challenges in sustainable planning for landscape connectivity. In this Special Issue, we aim to explore the recent advances in connectivity planning from a multiscale perspective by considering global change, including the analysis of the effects of climate change, the selection of the most suitable methods for evaluating the sustainability of spatial connectivity, and the assessment of the predictive abilities of simulation techniques in different contexts. This Special Issue welcomes submissions including, but not limited to, the above topics in the form of review, research, or perspective articles

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
