

Special Issue

Land Evapotranspiration and Groundwater Recycling

Message from the Guest Editors

This Special Issue of *Sustainability* focuses on advances on land evapotranspiration and groundwater recycling. Potential topics include but are not limited to the following:

- Satellite-based land evapotranspiration estimation;
- Evaluation of multiple land evapotranspiration products;
- Generation and assessment of land evapotranspiration and groundwater products;
- GRACE gravity satellite estimation method;
- Land surface data assimilation
- Remote sensing data fusion;
- Land surface simulation;
- Ensemble simulation and forecasting;
- Model parameter optimization;
- Machine learning for model simulation and application
- Global and regional land evapotranspiration and groundwater evaluation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
