Special Issue

Land Evapotranspiration and Groundwater Recycling

Message from the Guest Editors

This Special Issue of *Sustainability* focuses on advances on land evapotranspiration and groundwater recycling. Potential topics include but are not limited to the following:

- Satellite-based land evapotranspiration estimation;
- Evaluation of multiple land evapotranspiration products;
- Generation and assessment of land evapotranspiration and groundwater products;
- GRACE gravity satellite estimation method;
- Land surface data assimilation
- Remote sensing data fusion;
- Land surface simulation;
- Ensemble simulation and forecasting;
- Model parameter optimization;
- Machine learning for model simulation and application
- Global and regional land evapotranspiration and groundwater evaluation.

Guest Editors

Dr. Zhenhua Di

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
