

Special Issue

Logistics Infrastructure and Sustainability

Message from the Guest Editors

The Special Issue aims to provide future pathways and roadmaps for sustainable logistics infrastructure development. Hence, we encourage articles exploring the current state and transformation potentials for developing logistics infrastructures, with a special focus on sustainability. Issues to be addressed in submissions could include, but are not limited to, the following:

- Assessment, maintenance, monitoring, and management of sustainability issues in logistics infrastructures.
- Environmental and sustainable performance indicators linked to logistics infrastructure.
- Causality between logistics infrastructures and sustainable development.
- Innovations of modern technology and recent digital trends in logistics infrastructures for sustainable development.
- Integration of blockchains and other technologies in logistics infrastructures for sustainable development.
- Digital transformation and Industry 4.0 in logistics infrastructures for sustainable development.
- Smart logistics and transport infrastructures and the associated sustainability issues.
- Big data analytics in managing logistics infrastructures for sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
