

Special Issue

Application of Low-cost Sensors for Environmental Exposure Assessment and Mitigation

Message from the Guest Editor

People are exposed to environmental pollution every day regardless of their location and activities. The new era of low-cost sensors has significantly changed air quality and environmental monitoring technologies and public perception of ambient environmental assessment at a local scale. This Special Issue aims to publish high-quality research papers on the interdisciplinary field of real-time environmental monitoring using low-cost sensors, big data analytics, data quality control methodologies and the implications for exposure mitigation strategies.

- Low-cost sensor networks
- Real-time indoor and ambient air quality and environmental monitoring
- Crowd-sourcing platforms
- Data assimilation
- Spatio-temporal modelling and prediction
- Environmental exposure mitigation strategies

Guest Editor

Dr. Mandana Mazaheri

Senior Environmental Assessment Officer, Department of Planning and Environment (NSW), Sydney, Australia

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
