Green Nanotechnology: Empowering Nutritionally Rich Crops and Microgreens for Global Food Security

Message from the Guest Editors

In recent years, metal nanoparticles have offered promising prospects in different fields. By bridging the gap between traditional knowledge and modern agricultural innovation, this research topic endeavors to harness the intrinsic potential of green nanotechnology synthesis to address contemporary nutritional challenges and promote sustainable food systems. The synthesis of nanoparticles using naturally occurring reagents such as vitamins, sugars, and plant extracts as reductants may provide a potential for nanotechnology. Plant-based extracts also present promising candidates suitable for the large-scale biosynthesis of nanoparticles. Therefore, the green synthesis of nanoparticles has become a novel contributor to sustainable In conclusion, nanotechnology holds the potential for revolutionizing and promoting sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
