

Special Issue

Sustainable Transportation System Management and Optimization

Message from the Guest Editors

Sustainable transport is now a trend that affects modern cities worldwide. While striving to achieve sustainability, they take on various challenges that not only improve the quality of transport but, above all, will not affect the quality of life of inhabitants of these cities. Scientists assist by offering various types of support in the form of ways to manage, model and optimize transport systems in such a way that the intended goals can be achieved. This Special Issue is dedicated to the subject of "Sustainable Transportation System Management and Optimization". The Special Issue concerns interdisciplinary issues related to broadly understood civil engineering and transport. Any research regarding current considerations in terms of sustainable transport systems, including analyses, mathematical and business models, algorithms, reviews, case studies or extensive literature analyses are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
