

Special Issue

Sustainable Fuel for Green Shipping

Message from the Guest Editors

We are excited to invite you to contribute to our Special Issue, titled “Sustainable fuel technologies for future green shipping”, which focuses on the future of clean energy in maritime transportation. The initiative of reducing carbon footprint in the global shipping industry has become a driving force for innovation, with the maritime sector transitioning away from traditional fossil fuels to embrace greener, more sustainable alternatives. And the exploration and adoption of alternative fuels are essential steps in fostering a cleaner, more sustainable maritime industry. This Special Issue aims to create a platform for the exchange of groundbreaking research and innovative solutions to tackle the environmental challenges faced by the global shipping industry. We encourage the submission of original research that explores the development, adoption, and implementation of alternative fuels and technologies that have the potential to transform marine transportation. We look forward to your innovative contributions that will help shape the future of sustainable shipping and drive the global transition toward a greener maritime industry.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
