Micro and Macroeconomic Determinants of Productivity Growth and Long-Term Sustainable Development in Central European Economies

Message from the Guest Editor

For the past three decades, Central European economies have come a long way—from ineffective, centrally planned economies to quite stable and relatively fast growing markets. These economies have managed to build a relatively effective macroeconomic governance within modern and up-to-date institutions, which have enabled the region to join the European Union. The emergence of dynamic market economies and the process of quick modernization have been driven by external forces, such as the inflow of foreign direct investment and expansion of global corporations in the region, and the effect of microeconomic factors, such as activities of relatively well-educated citizens, with great entrepreneurial potential or long term institutional determinants, which were not destroyed during the few decades of communism...
